PowerVolt

The Power for your system

PowerVolt is a manufacturer of Power Transformers and Power Supplies. We are proud to say that we manufacture standard (off-the-shelf) and custom transformers and power supplies. Founded in 1973 PowerVolt grew steadily, quickly acquiring a strong reputation for it's high standards of quality and reliable products. With Power Volt, the service does not stop after the sale. We develop long-term partnerships with each client.

Facilities:

Headquartered in Addison, Illinois, USA, with 30,000 sq. ft. of manufacturing and office space. We leverage domestic and international partnerships to optimize supply chain design and costs for our customers.

Ensign

The Flagship of Custom Magnetics

As the Flagship of Custom magnetics, Ensign has come a long way since 1939. We have forged a reputation as a world-class manufacturer of electrical transformers, inductors and adapters for an ever-broadening array of industrial and commercial applications. Today, Ensign is a customer driven, ISO 9001:2015 registered organization that offers OEMs low-volume and high-volume production from domestic and off-shore facilities. Both facilities meet all applicable safety agency requirements, and share a common commitment to continuous improvement.

Facilities:

Located in Bellevue, Iowa with over 23,500 sq. ft of manufacturing and office space.

Wabash

The Mark of Quality

Wabash Transformer Inc. was founded in 1966, and is presently located in Addison, Illinois. This facility offers a full range of Custom and Standard power transformers. Wabash Transformer applications include HVAC, Medical, Pool and Spa, Metering equipment, Household appliances and many others. "The Mark of Quality" is more than just a slogan, it is the driving force behind all our efforts. We are committed to bring you the best quality at competitive prices.

Facilities:

Before 2016, facility was located in Clarence, Iowa. In 2016, it was merged with Powervolt facility in Addison, Illinois with over 30,000 sq. ft of manufacturing and office space.

Manufacturing

PowerVolt

High volume manufacturing with latest automation and technology. Capable of producing 12000 units/shift. All our products are Designed, Manufactured, and 100% Tested in each of our locations in U.S.A. This allows stringent control over quality and service. Also, allowing us to schedule just-in-time delivery to save inventory cost to our valuable customers. Our success is based on our quality.

Ensign

For cellular manufacturing with vision, come to Bellevue, Iowa. Ensign's up-to-date CNC production and inspection systems have dramatically raised the bar for product consistency, while substantially enhancing our ability to "flex" with customers' ever-changing production schedules. While new technology clearly defines Ensign's stance on process improvement.

Wabash Transformer

Wabash achieve high manufacturing through extensive automation of coil winding, assembly lines and testing. State of the art winding and stack welding machines allow a production capacity of twelve thousand parts per shift. Highly skilled operators with 30 years average experience take personal pride in quality products they produce. We at Wabash Transformer believe: Quality goes in before name goes on.

POWERVOLT GROUP

Engineering

With our 40 years experience in designing power transformers, we offer an ideal solution for your application through our pre-engineered off the shelf product line or custom designed to meet your specifications. The custom designs are thoroughly tested in our laboratory and then submitted for your approval. Rapid prototyping assures fast development of your end product. Our goal is to design products to meet or exceed your expectations providing highest quality at economical prices.

Rest assured, nothing is left to chance. Custom designs are first sent to the prototype laboratory and are thoroughly evaluated and tested for performance, and then submitted for your approval. We are not satisfied until you are satisfied. Through concurrent engineering, all phases of the process - design, production and quality assurance -- come together to ensure the highest standards of product integrity, extended service life and cost economy. The goal is nothing less than routinely exceeding customer expectations.

Quality goes in before the name goes on.

The PowerVolt Group achieves high manufacturing through extensive automation of coil winding, assembly lines and testing. State of the art winding and stack welding machines allow a production capacity of ten thousand parts per day.

Highly skilled operators with 30 years average experience take personal pride in quality products they produce. We at PowerVolt Group believe: Quality goes in before name goes on.

Agency Approvals

PowerVolt Group Engineers can design products to meet domestic and international safety agency standards. These catalog product lines have been tested and recognized by one or more of the following Safety Agencies:

Partner with Us & Connect with Success!

- Zero defect, 100% tested
- Highly competitive pricing
- 3 day shipment
- On-time delivery
- Short lead time

POWERVOLT GROUP

Terms and Conditions

How to Order: Contact your local distributor or representative for immediate order placement or price and delivery information. Please refer to PowerVolt Group distributor and representative listing for the office nearest you. For factory direct orders or technical assistance, please contact our sales office.

Prices: F.O.B. Factory, Illinois. All prices listed are for domestic shipments only. Prices and specifications are subject to change without notice. Federal, state, and local taxes are not included and will be added where applicable. Additional charges may apply for rush orders and special handling. Non-stock and custom products will incur non refundable engineering charges. Export orders will incur an additional \$50.00 handling charge.

Discounts: PowerVolt Group offers liberal discounts to quantity buyers. OEM contracts are available. Consult PowerVolt Group or your local representative/distributor for prompt quotations.

Terms: Net 30 days, subject to credit approval. Payments in U.S. dollars only. All sales are subject to PowerVolt Group terms and conditions exclusively.

Delivery: Scheduled orders are acceptable with a firm delivery schedule.

Shipping: All orders are shipped surface freight collect unless otherwise instructed. Location permitting, small shipments are made by United Parcel Service (UPS); larger shipments, by insured motor. Shipments can be made by air upon request. Every effort is made to adequately pack products. However, if the products are received in damaged condition, it is the customers responsibility to contact the carrier and file a claim for damages.

Lead Times: Please consult factory for current lead times.

Quotations: All written quotations from PowerVolt Group shall be valid for 30 days from the date of quotation. Inquiries for customs or modifications of the existing products are welcome.

Samples: No charge samples will be granted if product total cost does not exceed \$10.00. customer is responsible for shipping charges.

Repair Service: All products to be returned for repair require a Return Material Authorization (RMA) number prior to return shipment. Contact the factory for details and authorization number. Products ordered in error are subject to a 25% restocking charge. Non-standard, custom, or modified products cannot be returned for credit.

Cancellation Policy: A 30 day notice is necessary for cancellation of pre-engineered items. A 25% restocking charge will apply. For volume orders, the quantity shipped versus the quantity ordered will determine price difference and the customer will be charged accordingly. Custom products are non-cancelable and non-returnable.

Special stocking, Kanban or Consignment agreements will prevail under all circumstances.

Warranty

PowerVolt Group warrants each product of its manufacture that does not perform to published specifications as a result of defective material and/or workmanship, for a period of two(2) full years from the date of shipment to the original purchaser. PowerVolt Group obligation under this warranty is limited to servicing or adjusting any product returned to the factory for that purpose, or replacing any defective parts. Transportation charges are to be prepaid by the purchaser, and a Return Material Authorization (RMA) number must be obtained before returning for warranty examination. If the failure has been caused by misuse, operation in excess of specifications or modifications by customer, repairs shall be billed at cost; in such cases a cost estimate shall be submitted before work is started.

PowerVolt Group reserves the right to make changes or improvements in its products without incurring any obligation to install the same on products previously manufactured.

PowerVolt Group neither assumes, nor authorizes any other person to assume on its behalf any liabilities for consequential damages of any kind through the use or misuse of its products by the purchaser or others. No other obligations are expressed or implied.

POWERVOLT GROUP

POWERVOLT GROUP

Corporate Mission/Vision and Guiding Values

Mission:

To be the highest quality and most cost effective supplier to our customers

Achieved through:

- **Technical and Innovative Solutions**
- **World Class Manufacturing**
- **Customer Focus**
 - **Respectful Communication**
 - **Ease of doing Business**

Guided by:

- **Excellence in Quality**
 - **Compliance to Requirements**
 - **Continuous Improvement**
 - **Personal Pride in our Work**
- **Highest Degree of Ethics**
 - **Passion for our Partners' Mutual Success**
 - **Willing to take on Big Challenges and deliver Results**
 - **Social, Environmental Responsibility**

POWERTVOLT
The Power for your System

Create Your Own:

- **Select desired input.**
- **Select desired output.**
- **Select desired VA (Watts).**

Agency Approvals:

- **UL/cUL; CE mark upon request.**
- **Meets or Exceeds NEMA, ANSI, NMBTA and JIC.**

Features:

- **Input Voltages Available:**
120/208/220/230/240/277/347/380/415/416/440/460/480/550/575/600V
- **Output Voltages Available:** 12, 24, 25, 85, 95, 100, 110, 115, 120, 130, 220, 240V
- **Frequency** 50/60 Hz
- **Single or multiple primaries/secondaries**
- **Finger safe terminal blocks** (configurable to accommodate various wire gauges)
- **10 year warranty**

Benefits:

- **Reduce SKU count by consolidating multiple configurations**
- **Competitive prices for OEM customers**
- **Stocking and supply chain programs available upon request**

Options:

- **Fuse blocks (CC style)**
- **CC fuse block cover (with and without indicators)**
- **Lead Wires instead of terminal blocks**

Industrial Control Transformers - Standard Series: GP

- Power Rating 25VA to 2000VA
- Frequency 60Hz & 50/60 Hz
- High inrush current capability
- Voltage regulation exceeds NEMA ST-1
- IEC Touch proof terminals
- International input/output voltages
- Copper coils for excellent thermal characteristics
- Insulation Class B (130°C), F(155°C), H(180°C), N(200°C)
- Optional input/output fuse(s)
- Fuse block kits per request & easy installation
- Heavy gauge steel mounting plate to match various mounting dimensions
- 10 year warranty

Agency Approvals:

- UL/cUL 5085-2 Listed, CE marked, UL File E47299

Applications:

The international series GP transformers are especially suited for applications requiring high inrush current and output voltage stability. This is typically the case when electromagnetic devices such as relays, solenoids, contactors, bells, signals and alarm systems are initially energized.

Selecting the right transformer:

To correctly size a control transformer best suited for an application, in addition to the minimum voltage required to operate the circuit, three characteristics of the load circuit must be determined. These are total steady state (sealed) VA, total inrush VA and inrush load power factor. (The operating VA data for the devices should be available from the manufactures)

- Total steady state (sealed) VA is the volt-amperes that the transformer provides for continuous operation over an extended period of time.
- Total inrush VA is the volt-amperes that the control transformer must deliver upon initial energization of the load circuit. Typically, energizations of electromagnetic devices take 20-50milliseconds and can draw anywhere from 3 to 10 times the nominal operating current. (Inrush VA data should be available from the device manufacturer).
- Inrush load power factor is difficult to determine without complex vector analysis of all the load components. Generally such an analysis is not feasible. Therefore a safe assumption is 40% load power factor.

Six easy steps:

Once the three variables are determined, follow these steps to select the proper transformer.

- Determine the primary (input line) and secondary (output) voltage required along with supply frequency. (i.e. 50 or 60 Hz)
- Calculate total sealed VA of the load circuit by adding the sealed steady-state VA of all devices that will be energized simultaneously.
- Calculate the arithmetic sum of the inrush VA of all components that will be energized at the same time. Make sure to add the VA load of non-inductive devices that do not have inrush VA (such as lamps etc.)

Take into consideration start-up sequence to determine the maximum point of inrush of the load circuit. If the inrush current for the devices is unknown, then it is recommended to use 40% inrush power factor.

- Calculate the total inrush VA using one of these two methods:
 - Total inrush VA = $\sqrt{(VA \text{ sealed})^2 + (VA \text{ inrush})^2}$ or
 - Total inrush VA = VA sealed + VA inrush (method B will result in a slightly oversized transfer)
- Adjust for voltage regulation by referring to the transformer regulation data table below. If the nominal supply voltage does not fluctuate more than 5%, then refer to the 90% secondary voltage column for correct rating. If the nominal supply voltage varies up to 10%, then the 95% secondary voltage column should be used. Current standards require the electromagnetic devices to operate reliably at 85% of their rated name-plate voltage. In this case the 85% secondary voltage column should be referenced to correctly size the transformer.
- Select the VA rating that corresponds to the result in the appropriate secondary voltage column from step 5, that is closest to, but not less than,
 - The total sealed VA calculated in step 2
 - The total inrush VA calculated in step 4

REGULATION DATA TABLE

VA Rating	INRUSH VA @ 40% PF		
	85% Secondary Voltage	90% Secondary Voltage	95% Secondary Voltage
25	160	130	95

Industrial Control Transformers - Econoline Series: GP

- Power Rating 300VA to 1500VA
- Frequency 50/60 Hz
- High inrush current capability
- Voltage regulation exceeds NEMA ST-1
- IEC Touch proof terminals
- International input/output voltages
- Copper coils for excellent thermal characteristics
- Insulation Class F(155°C)
- Optional input/output fuse(s)
- Fuse block kits per request & easy installation
- Heavy gauge steel mounting plate to match various mounting dimensions
- 10 year warranty

Agency Approvals:

- UL/cUL 5085-2 Listed, CE marked, UL File E47299

Applications:

The international series GP transformers are especially suited for applications requiring high inrush current and output voltage stability. This is typically the case when electromagnetic devices such as relays, solenoids, contactors, bells, signals and alarm systems are initially energized.

Selecting the right transformer:

To correctly size a control transformer best suited for an application, in addition to the minimum voltage required to operate the circuit, three characteristics of the load circuit must be determined. These are total steady state (sealed) VA, total inrush VA and inrush load power factor. (The operating VA data for the devices should be available from the manufactures)

- Total steady state (sealed) VA is the volt-amperes that the transformer provides for continuous operation over an extended period of time.
- Total inrush VA is the volt-amperes that the control transformer must deliver upon initial energization of the load circuit. Typically, energizations of electromagnetic devices take 20-50milliseconds and can draw anywhere from 3 to 10 times the nominal operating current. (Inrush VA data should be available from the device manufacturer).
- Inrush load power factor is difficult to determine without complex vector analysis of all the load components. Generally such an analysis is not feasible. Therefore a safe assumption is 40% load power factor.

Six easy steps:

Once the three variables are determined, follow these steps to select the proper transformer.

- Determine the primary (input line) and secondary (output) voltage required along with supply frequency. (i.e. 50 or 60 Hz)
- Calculate total sealed VA of the load circuit by adding the sealed steady-state VA of all devices that will be energized simultaneously.
- Calculate the arithmetic sum of the inrush VA of all components that will be energized at the same time. Make sure to add the VA load of non-inductive devices that do not have inrush VA (such as lamps etc.)

Take into consideration start-up sequence to determine the maximum point of inrush of the load circuit. If the inrush current for the devices is unknown, then it is recommended to use 40% inrush power factor.

- Calculate the total inrush VA using one of these two methods:
 - Total inrush VA = $\sqrt{(VA \text{ sealed})^2 + (VA \text{ inrush})^2}$ or
 - Total inrush VA = VA sealed + VA inrush (method B will result in a slightly oversized transfer)
- Adjust for voltage regulation by referring to the transformer regulation data table below. If the nominal supply voltage does not fluctuate more than 5%, then refer to the 90% secondary voltage column for correct rating. If the nominal supply voltage varies up to 10%, then the 95% secondary voltage column should be used. Current standards require the electromagnetic devices to operate reliably at 85% of their rated name-plate voltage. In this case the 85% secondary voltage column should be referenced to correctly size the transformer.
- Select the VA rating that corresponds to the result in the appropriate secondary voltage column, from step 5 that is closest to, but not less than,
 - The total sealed VA calculated in step 2
 - The total inrush VA calculated in step 4

REGULATION DATA TABLE

VA Rating	INRUSH VA @ 40% PF		
	85% Secondary Voltage	90% Secondary Voltage	95% Secondary Voltage

Note:

- If the rated secondary current is under 9 amps, the secondary rating of overcurrent protection is 167% limit of rated secondary current.
- If the rated secondary current is greater than or equal to 9 amps, the secondary rating of overcurrent protection is 125% limit of rated secondary current.
- When secondary is protected by overcurrent protection, the primary rating of overcurrent protection is 250% limit of rated primary current.
- No need of secondary overcurrent protection if transformer is equipped with Primary Overcurrent protection.

Reference: NEC 450.3(B)

POWERVOLT GROUP

Industrial Control Transformers - General Purpose Series: Enclosed Control Transformers

- Power Rating 250VA to 2000VA
- Primary Voltage 208V - 600V
- Secondary Voltage 120/240V
- Frequency 60Hz & 50/60 Hz
- High inrush current capability
- NEMA 3R nonventilated weatherproof enclosure
- Knockouts provided on back, bottom and sides
- High grade silicon steel core
- Mounting holes on side for easy access
- Wiring compartment includes ground stud

Agency Approvals:

- UL/cUL 5085-2 Listed, CE marked, UL File E47299
- Meets or Exceeds NEMA 3R, ANSI, NMBTA, JIC & IEC standards

Applications:

NEMA 3R nonventilated weatherproof enclosures come equipped with general purpose power transformers. These units feature encapsulated copper coils and steel cores with integrated junction boxes for easy wiring. More freedom in choosing different options is provided by improved wiring compartment room and termination spacing.

General information:

GP's whole transformer series offers dependable, silent transformer performance. Models of type GP are UL/cUL listed. Appliance, lighting, and power loads are supplied by general-purpose transformers rated at 600 volts or less from electrical distribution systems. Standard load voltages are 120 and 240 volts, and standard distribution voltages are 600, 480, 277 and 208 volts. The load voltage is derived from the distribution voltage using a transformer. These transformers can be installed directly at the load to supply the appropriate voltage for the application, as no vaults are needed for installation. As a result, long, expensive, low-voltage feeders are no longer necessary.

Construction:

The NEMA 3R nonventilated waterproof enclosure houses the coils and core. Encapsulated coils and core are features of Type GP units. It is recommended to use 40% inrush power factor.

Temperature class:

Insulation systems are categorized by industry standards using the following rating scheme.

Classification of Insulation Systems

Ambient	+ Winding Rise	+ Hot Spot	= Temp. Class
40°C	55°C	10°C	105°C
40°C	80°C	30°C	150°C
40°C	115°C	25°C	180°C
40°C	150°C	30°C	220°C

All standard, general-purpose, GE transformers meet all applicable NEMA, ANSI, UL, and IEEE standards.

Insulation systems with lower temperature ratings are intended to last the same amount of time as systems with higher temperature ratings.

Class 2 UL5085-3 Transformer

5VA - 30VA, Inherently Energy Limited

Series: CL - Lead Wires & Quick-Connects

- Power Rating 5VA to 30VA with Lead wires
- Power Rating 10VA to 30VA with Quick-Connect Terminals
- No Secondary Fusing Required
- Frequency 50/60Hz
- Insulation Class F (155°C)

Agency Approvals:

- UL/cUL 5085-3 Class 2 Recognized
(UL File E49606 & ETL Report 103284440CHI-001)
- UL 1446 Insulation System File E95662

* Multi voltage combinations are available - consult factory.

Class 2  US

 RoHS₃

Lead Wires

Type HX Foot Mount - Steel bracket welded to the bottom of the laminations for easy mounting

Type GX Panel Mount - 0.179 (4.55 mm) diameter holes in each corner to allow direct mounting to a panel.

Lead Wires: All leads are 18 AWG stranded 2/64 (0.794 mm) insulation thickness. Standard parts have 12 (305 mm) total length with 1/2 (12.7 mm) strip.

Type HX - Foot Mount

Type GX - Panel Mount

Quick-Connects

Type BB Foot Mount, Pri & Sec on Same Side - Quick connect terminals with line and load terminations on the same side of transformer.

Type AE Laydown, Pri & Sec on Top Side - Quick connect terminals with line and load terminations on the top of transformer.

Type AB Foot Mount, Pri & Sec on Opposite Side - Quick connect terminals with line and load terminations on opposite sides of transformer

Terminals:

Standard male quick connects - 0.250 x 0.032 (6.35 x 0.81 mm)

Other available quick connects - 0.187 x 0.032 (4.75 x 0.81 mm)

Type BB - Foot Mount, Pri & Sec on Same Side

Type AE - Laydown, Pri & Sec on Top Side

Type AB - Foot Mount, Pri & Sec on Opposite Side

POWERVOLT GROUP

Class 2 UL5085-3 Transformer

6VA, Inherently Energy Limited

Series: CL - Lead Wires & Quick-Connects

- Power Rating 6VA
- No Secondary Fusing Required
- Frequency 50/60Hz
- Insulation Class F (155°C)

Agency Approvals:

- UL/cUL 5085-3 Class 2 Recognized (File E49606)
- UL 1446 Insulation System File E95662

Class 2 

 RoHS₃

* Multi voltage combinations are available - consult factory.

Lead Wires

Type HX Foot Mount - Steel bracket welded to the bottom of the laminations for easy mounting

Type GX Panel Mount - 0.179 (4.55 mm) diameter holes in each corner to allow direct mounting to a panel.

Lead Wires: All leads are 18 AWG stranded 2/64 (0.794 mm) insulation thickness. Standard parts have 12 (305 mm) total length with 1/2 (12.7 mm) strip.

Type HX - Foot Mount

Type GX - Panel Mount

Quick-Connects

Type BB Foot Mount, Pri & Sec on Same Side - Quick connect terminals with line and load terminations on the same side of transformer.

Type AE Laydown, Pri & Sec on Top Side - Quick connect terminals with line and load terminations on the top of transformer.

Type AB Foot Mount, Pri & Sec on Opposite Side - Quick connect terminals with line and load terminations on opposite sides of transformer

Terminals:

Standard male quick connects - 0.250 x 0.032 (6.35 x 0.81 mm)

Other available quick connects - 0.187 x 0.032 (4.75 x 0.81 mm)

Type BB - Foot Mount, Pri & Sec on Same Side

Type AE - Laydown, Pri & Sec on Top Side

POWERVOLT GROUP

Class 2 UL5085-3 Transformer

40VA, Core 3/4, Non-Inherently Energy Limited

Series: CL - Lead Wires & Quick-Connects

- Power Rating 40VA
- Secondary Fusing Required (Provided by Factory)
- Frequency 50/60Hz
- Insulation Class F (155°C)
Class B (130°C) Insulation available

Agency Approvals:

- UL/cUL 5085-3 Class 2 Recognized
(UL File E49606 & ETL Report 103284440CHI-001)
- UL 1446 Insulation System File E95662

Class 2 

* Multi voltage combinations are available - consult factory.

Lead Wires

Type HX Foot Mount - Steel bracket welded to the bottom of the laminations for easy mounting

Type GX Panel Mount - 0.179 (4.55 mm) diameter holes in each corner to allow direct mounting to a panel.

Lead Wires: All leads are 18 AWG stranded 2/64 (0.794 mm) insulation thickness. Standard parts have 12 (305 mm) total length with 1/2 (12.7 mm) strip.

Type HX - Foot Mount

Type GX - Panel Mount

Quick-Connects

Type BB Foot Mount, Pri & Sec on Same Side - Quick connect terminals with line and load terminations on the same side of transformer.

Type AE Laydown, Pri & Sec on Top Side - Quick connect terminals with line and load terminations on the top of transformer.

Type AB Foot Mount Pri & Sec on Opposite Side - Quick connect terminals with line and load terminations on opposite sides of transformer

Terminals:

Standard male quick connects - 0.250 x 0.032 (6.35 x 0.81 mm)

Other

available quick connects - 0.187 x 0.032 (4.75 x 0.81 mm)

Type BB - Foot Mount, Pri & Sec on Same Side

Type AE - Laydown, Pri & Sec on Top Side

Type AB - Foot Mount, Pri & Sec on Opposite Side

Dimensions (Inches)	40VA - V
A	2.410
B	1.250
Weight (Lbs)	0.710

Class 2 UL5085-3 Transformer

60VA - 75VA, Non-Inherently Energy Limited

Series: CL - Lead Wires & Quick-Connects

- Power Rating 60VA to 75VA
- Secondary Fusing Required (Provided by Factory)
- Frequency 50/60Hz
- Insulation Class F (155°C)
Class B (130°C) Insulation available

Agency Approvals:

- UL/cUL 5085-3 Class 2 Recognized (File E49606)
- UL 1446 Insulation System File E95662

* 60 & 75VA transformers must have overcurrent protectors in series with the secondary winding.

Class 2 

Lead Wires

Type HX Foot Mount - Steel bracket welded to the bottom of the laminations for easy mounting

Type GX Panel Mount - 0.218 (5.54 mm) diameter holes in each corner to allow direct mounting to a panel.

Lead Wires: All leads are 18 AWG stranded 2/64 (0.794 mm) insulation thickness. Standard parts have 12 (305 mm) total length with 1/2 (12.7 mm) strip.

Type HX - Foot Mount, Internally Fused

Type HX - Foot Mount, Integral Circuit Breaker

Type GX - Panel Mount

Quick-Connects

Type BB Foot Mount, Pri & Sec on Same Side - Quick connect terminals with line and load terminations on the same side of transformer.

Type AE Laydown, Pri & Sec on Top Side - Quick connect terminals with line and load terminations on the top of transformer.

Type AB Foot Mount, Pri & Sec on Opposite Side - Quick connect terminals with line and load terminations on opposite sides of transformer

Terminals:

Standard male quick connects - .250 x .032 (6.35 x .81mm).

Other available quick connects - .187 x .032 (4.75 x .81 mm)

Type BB - Foot Mount, Pri & Sec on Same Side

Type AE - Laydown, Pri & Sec on Top side, Internally Fused

Type AE - Laydown Termination, Pri & Sec on Top Side, Integral Circuit Breaker

Dimensions (Inches)	Internally Fused	w/ Integral Circuit Breaker	Standard Part
A	2.500	3.300	2.500
B	1.000	1.000	1.000

Class 2 UL5085-3 Transformer

Printed Circuit Mount

Series: Captain Class (P)

Ener-G-Star™
Energy Efficient Transformers

Flame Retardant Materials

- Flame Retardant, UL 94V0 Rating
- High Efficiency
- 1.1 VA or 2.4 VA Power Rating
- Single or Dual Primary, 115-120V, 115-120/230-240V, 230-240V (Optional 120V, 120/240V or 240V)
- 50/60Hz (Economy 60Hz-only Models Available)
- Single Secondary (Optional Dual or Center-tapped)
- Any Secondary Voltage from 5V to 24V in 1V Increments
- Insulation Material 130°C Standard (Optional 200°C)
- Optional Internal Current or Thermal Protectors
- High Isolation, 2500V, 100% Tested
- Low Capacitive Coupling, no Electrostatic Shield Needed

Agency Approvals:

- UL/cUL 5085-2 Recognized (File E47299)
- UL 1446 Recognized Insulation system (File E95662)
- UL/cUL 5085-3 Class 2 Recognized (File E43609), P001 (up to 20V) & P002 (up to 24V)

Printed Circuit Mount - Standard Profile

High Performance

Series: Captain Class (P)

Examples:

P006-2-724 = 6VA, Dual (series/parallel) Primary, 50/60Hz, no internal protector, Single 24V Secondary
P006-1A024 60HZ = 6VA, Single 115-120V Primary, 60Hz only, 130°C thermal cutoff, Dual 12/24V (series/parallel) Secondary

Printed Circuit Mount	PXXX	-X	X	XXX	XXXX
Rating: P001 = 1.1VA, models up to 20V are also Class 2 (see Page 59) P002 = 2.4VA, models up to 24V are also Class 2 (see Page 59) P006 = 6VA P012 = 12VA P020 = 20VA P036 = 36VA					
Primary Voltage: -1 = 115-120V -2 = 115-120V / 230-240V Dual (series / parallel) -3 = 230-240V					
Optional Internal Protector: - (dash) = No internal protector A through Z = Over-current and/or over-temperature protection (Contact for list of available protectors)					
Secondary Voltage (10V through 120V, in 1V Increments): 010 through 120 = Dual Secondary (series / parallel) Number represents the voltage of the series connection. <i>Example: "024" = 12V (parallel) / 24V (series)</i> 510 through 620 = Center-tapped Secondary Number represents the total voltage plus 500. <i>Example: "524" = 24V with center-tap (12V on each side)</i> 710 through 820 = Single Secondary Number represents the voltage plus 700. <i>Example: "724" = 24V</i>					
Frequency: Blank = 50/60Hz -60HZ = Economy 60Hz-only

POWERVOLT GROUP

Printed Circuit Mount - Standard Profile

High Performance

Series: Captain Class (P)

Ener-G-Star™
Energy Efficient Transformers

Flame Retardant Materials

- Flame Retardant, UL 94V0 Rating
- High Efficiency
- 1.1 VA or 36 VA Power Rating
- Single or Dual Primary, 115-120V, 115-120/230-240V, 230-240V (Optional 120V, 120/240V or 240V)
- 50/60Hz (Economy 60Hz-only Models Available)
- Dual Secondary (Optional Single or Center-tapped)
- Any Secondary Voltage from 5V to 120V in 1V Increments
- Insulation Material 130°C Standard (Optional 200°C)
- Optional Internal Current or Thermal Protectors
- High Isolation, 2500V, 100% Tested
- Low Capacitive Coupling, no Electrostatic Shield Needed

Agency Approvals:

- UL/cUL 5085-2 Recognized (File E47299)
- UL 1446 Recognized Insulation System (File E95662)
- UL/cUL 5085-3 Class 2 Recognized (File E43609), P001 (up to 20V) & P002 (up to 24V)

Over 95,000 additional Captain Class model configurations available!

Refer to the Part Numbering Scheme on the next page to **configure your own part** with following options:

- Primary: 120V, 120/240V, or 240V
- Secondary: 5V to 120V, in 1V increments (Single or Dual)
- Frequency: 50/60Hz, or economy 60Hz-only
- With or without current or thermal protector(s)
- Temperature Class: 130°C, or 200°C

Any application, Any requirement, Contact us for our Custom Designs

POWERVOLT GROUP

Printed Circuit Mount - Standard Profile
Series: SPW-S/SPW-D

- Power Rating 1.1VA to 36VA
- Single or Dual Primary, 115V or 115/230V
- Frequency 50/60HZ
- Series or Parallel Secondary
- High Isolation – 2500 Vrms
- Insulation Material (130°C) Standard (Optional 200°C)
- No Electrostatic Shield Needed

Agency Approvals:

- UL/cUL 5085-2 Recognized (File E47299)
- CSA C22.2 #66 certified (063944)
- UL 1446 Recognized Class B (130°C) OBJY2, Insulation System File E95662

Printed Circuit Mount - Standard Profile Small Size Series: MT/DMT

MiniZtran™

- Power Rating 1.0VA to 24VA
- Single or Dual Primary, 115V or 115/230V
- Frequency 50/60HZ
- Series or Parallel Secondary
- Dielectric Strength – 1500 Vrms
- Insulation Class B (130°C)
- Small size printed circuit plug-in power transformer
- Optional Mounting Brackets (See Dim. Table)

Agency Approvals:

- UL/cUL 5085-2 Recognized (File E47299)
- UL 1446 Insulation System File E95662

“The Mark of Quality”

Our Aim is **ZERO DEFFECTS**

Our transformers are 100% tested.

Our highly skilled operators with 30 years average experience take personal pride in quality products they produce.

We at PowerVolt Group believe:

Quality goes in before name goes on.

Any application, Any requirement, Contact us for our Custom Designs

POWERVOLT GROUP

Printed Circuit Mount - Low Profile

High Performance

Series: Navigator Class (U)

Examples:

U006-2-024X = 6VA, Dual (series/parallel) Primary, 50/60Hz, no internal protector, Single 24V Secondary

U006-2A024 60HZ = 6VA, Dual Primary, 60HZ only, 130°C thermal cutoff, Dual 24V (series/parallel) Secondary

Printed Circuit Mount, Low Profile	UXXX	-X	X	XXX
Rating: U002 = 2.5VA U006 = 6VA U012 = 12VA U024 = 24VA U048 = 48VA				
Primary Voltages: -2 = 115-120/230-240 Dual (series / parallel)				
Optional Internal Protector: - (dash) = No internal protector A through Z = Over-current and/or over-temperature protection (Contact for list of available protectors)				
Secondary Voltages (10 through 240, in 1V Increments): 010 through 240 = Dual Secondary (series / parallel) Number represents the voltage of the series connection. <i>Example: "024" = 12V (parallel) / 24V (series)</i>				
Frequency: Blank = 50/60Hz -60HZ = Economy 60Hz-only				

Any application, Any requirement, Contact us for our Custom Designs

POWERVOLT GROUP

Printed Circuit Mount - Low Profile High Performance Series: Navigator Class (U)

Ener-G-Star™
Energy Efficient Transformers

Flame Retardant Material

- Flame Retardant, UL 94V0 Rating
- High Efficiency
- 2.5 VA to 48 VA Power Rating
- Series or Parallel Primary, 115-120V / 230-240V
- 50/60Hz (Economy 60Hz-only Models Available)
- Series / Parallel Secondary
- Any Secondary Voltage from 5V to 240V in 1V Increments
- Insulation Material 130°C Standard (Optional 200°C)
- Optional Internal Current or Thermal Protector

Agency Approvals:

- UL/cUL 5085-2 Recognized (File E47299)
- UL 1446 Recognized Insulation System (File E95662)

Over 9,000 additional Navigator Class model configurations available!

Refer to the Part Numbering Scheme on page 75 to **configure your own part** with following options:

- Secondary: 5V to 240V, in 1V increments
- Frequency: 50/60Hz, or economy 60Hz-only
- With or without current or thermal protector(s)
- Temperature Class: 130°C, or 200°C

Any application, Any requirement, Contact us for our Custom Designs

POWERVOLT GROUP

Printed Circuit Mount - Low Profile U.S Domestic Series: SPW

- Power Rating 2.5VA to 12VA
- Single Primary, 115/230V
- Frequency 50/60HZ
- Secondary Voltage 5 - 230V
- HIPOT – 1500 Vrms
- Insulation Material (130°C) Standard (Optional 200°C)
- No Electrostatic Shield Needed

Agency Approvals:

- UL/cUL 5085-2 Recognized (File E47299)
- UL 1446 Recognized Class B (130°C) OBJY2, Insulation System File E95662

Chassis Mount - Quick Connect Econoline Series: PP/DPP

- Power Rating 2.4VA to 100VA
- Single or Dual Primary, 115V or 115/230V
- Frequency 50/60HZ
- Center-tapped Secondary
- Dielectric Strength – 2500 Vrms
- Insulation Class B (130°C)
- High power density, same power in half the size
- Low Capacitive Coupling, no Electrostatic Shield Needed

Agency Approvals:

- American and Canadian agency approvals: (File E47299)
- UL 1446 Insulation System File E95662

Dual Primaries are designed to be used simultaneously. That is, they must be used either series or parallel connected (as one winding). Same applies to dual secondaries.

DESIGN FOR THE FUTURE

ENCAPSULATED TRANSFORMERS

- 0.6 VA to 70.0 VA
- UL/cUL 5085-2 General Purpose and 5085-3 Class 2 approved
- TUV EN 61558/EN60950 approved, and CE-marked
- Operating ambient temperatures up to +70°C

Any application, Any requirement, Contact us for our Custom Designs

POWERVOLT GROUP

Chassis Mount - Quick Connect

High Performance

Series: Commodore Class (T)

Example:

T075-2A724 = 75VA, Dual (series/parallel) Primary, 50/60Hz, with 130°C thermal cut-off, Single 24V Secondary

Frame Mount with Terminals	TXXX	-X	X	XXX	XXXX
Rating: T002 = 2.4VA, models up to 24V are also Class 2 (see Page 17) T006 = 6VA T012 = 12VA T030 = 30VA T050 = 50VA T056 = 56VA T100 = 100VA					
Primary Voltages: -1 = 115-120V -2 = 115-120V / 230-240V Dual (series / parallel) -3 = 230-240V -4 = 277, unavailable on Class 2 models -5 = 240/277, unavailable on Class 2 models					
Optional Internal Protector: - (dash) = No internal protector A through Z = Over-current and/or over-temperature protection (Contact for list of available protectors)					
Secondary Voltages (10 through 120, in 1V Increments): 010 through 120 = Dual Secondary (series / parallel) Number represents the voltage of the series connection. <i>Example: "024" = 12V (parallel) / 24V (series)</i> 510 through 620 = Center-tapped Secondary Number represents the total voltage plus 500. <i>Example: "524" = 24V with center-tap (12V on each side)</i> 710 through 820 = Single Secondary Number represents the voltage plus 700. <i>Example: "724" = 24V</i>					
Frequency: Blank = 50/60Hz -60HZ = Economy 60Hz-only

Chassis Mount - Quick Connect

High Performance

Series: Commodore Class (T)

Ener-G-Star™
Energy Efficient Transformers

Flame Retardant Material

- Flame Retardant, UL 94V0 Rating
- High Efficiency
- 2.4VA to 100VA Power Rating
- Single or Dual Primary, 115-120V, 230-240V, 277V, or 115-120V / 230-240V
- 50/60Hz (Economy 60Hz-only Models Available)
- Center-tapped Secondary (Optional Single or Dual)
- Any Secondary Voltage from 5V to 120V in 1V Increments
- Insulation Material 130°C Standard (Optional 200°C)
- Optional Internal Current or Thermal Protector
- High Isolation, 2500 Vrms, 100% Tested
- Low Capacitive Coupling, no Electrostatic Shield Needed
- Quick-Connect Terminals
- Optional Internal current or thermal protector

Agency Approvals:

- UL/cUL 5085-2 Recognized (File E47299)
- UL 1446 Recognized Insulation system (File E95662)
- UL/cUL 5085-3 Class 2 Recognized (File E43609), Only T002 (up to 24V)

Primary Schematics

Over 50,000 additional Commodore Class model configurations available!

Refer to the Part Numbering Scheme on the next page to **configure your own part** with following options:

- Primary: Single or Dual
- Secondary: 5V to 120V, in 1V increments (Single, Dual or Tapped)
- Frequency: 50/60Hz, or economy 60Hz-only
- With or without current or thermal protector(s)
- Temperature Class: 130°C, or 200°C

Any application, Any requirement, Contact us for our Custom Designs

Chassis Mount - Quick Connect

High Performance

Series: Commodore Class (T)

Ener-G-Star™
Energy Efficient Transformers

Flame Retardant Material

- Flame Retardant, UL 94V0 Rating
- High Efficiency
- 2.4VA Power Rating
- Single Primary, 115-120V or 230-240V
- 50/60Hz (Economy 60Hz-only Models Available)
- Single Secondary (Optional Center-tapped)
- Any Secondary Voltage from 10V to 24V in 1V Increments
- Insulation Material 130°C Standard (Optional 200°C)
- Optional Internal Current or Thermal Protector
- High Isolation, 2500 Vrms, 100% Tested
- Low Capacitive Coupling, no Electrostatic Shield Needed
- Quick-Connect Terminals
- Optional Internal current or thermal protector

Class 2     

Agency Approvals:

- UL/cUL 5085-2 Recognized (File E47299)
- UL 1446 Recognized Insulation system (File E95662)
- UL/cUL 5085-3 Class 2 Recognized (File E43609), (up to 24V)

POWERVOLT GROUP

Chassis Mount - Quick Connect General Purpose Series: SPWC

- Power Rating 40VA to 60VA
- Primary, 120/208/240/277
- Frequency 50/60HZ
- Secondary Voltage 24V
- High Isolation – 2500 Vrms
- Insulation Material (130°C) Standard
- Coated to resist dust and moisture

Agency Approvals:

- UL/cUL 5085-2 Compliant
- CSA C22.2 #66 certified (063944)

Partial Selection Guide (Standard Stock)

VA	Part Number	Primary	Secondary
40	SPWC-4600	120/208/240V	24V
40	SPWC-4601	120/208/240V	2.5V 8VA, 12V 11VA, 24V 40VA
40	SPWC-4602	120V	24V
40	SPWC-4603	240V	24V
40	SPWC-4604	277V	24V
40	SPWC-4605	120V	2.5V 8VA, 12V 11VA, 24V 40VA
40	SPWC-4606	240V	2.5V 8VA, 12V 11VA, 24V 40VA
40	SPWC-4607	277V	2.5V 8VA, 12V 11VA, 24V 40VA

Any application, Any requirement, Contact us for our Custom Designs

Chassis Mount - Quick Connect 24V Input Series: CSLP

- Power Rating 2.4VA to 12VA
- Primary, 24V
- Frequency 50/60HZ
- Secondary Voltage 10V-28V
- High Isolation – 2500 Vrms
- Insulation Material (130°C) Standard
- Coated to resist dust and moisture

Agency Approvals:

- UL/cUL 5085-2 Compliant
- UL 1446 Recognized Class B (130°C), Insulation System File E95662

• Indicates Like Polarity

Dual Secondaries are designed to be used simultaneously. That is, they must be used either series or parallel connected (as one winding).

VA Rating	Dimensions (Inches)						Weight Lbs
	L	W	H	A	B	ML

POWERVOLT GROUP

Chassis Mount - Lead Wires

High Performance

Series: Commander Class (L)

Examples:

L075-2A724 = 75VA, Dual (series/parallel) Primary, 50/60Hz, 130°C thermal cutoff, Single 24V Secondary

Frame Mount with Lead Wires	LXXX	-X	X	XXX	XXXX
Rating: L002 = 2.4VA, models up to 24V are also Class 2 (see Page 99) L006 = 6VA L050 = 50VA L012 = 12VA L056 = 56VA L020 = 20VA L075 = 75VA L030 = 30VA L100 = 100VA L040 = 40VA					
Primary Voltages: -1 = 115-120V -2 = 115-120V / 230-240V Dual (series / parallel) -3 = 230-240V -4 = 277, unavailable on Class 2 models -5 = 240/277 (tapped), unavailable on Class 2 models					
Optional Internal Protector: - (dash) = No internal protector A through Z = Over-current and/or over-temperature protection (Contact for list of available protectors)					
Secondary Voltages (10 through 120, in 1V Increments): 010 through 120 = Dual Secondary (series / parallel) Number represents the voltage of the series connection. <i>Example: "024" = 12V (parallel) / 24V (series)</i> 510 through 620 = Center-tapped Secondary Number represents the total voltage plus 500. <i>Example: "524" = 24V with center-tap (12V on each side)</i> 710 through 820 = Single Secondary Number represents the voltage plus 700. <i>Example: "724" = 24V</i>					
Frequency: Blank = 50/60Hz -60HZ = Economy 60Hz-only					

Any application, Any requirement, Contact us for our Custom Designs

POWERVOLT GROUP

Chassis Mount - Lead Wires

High Performance

Series: Commander Class (L)

Ener-G-Star™
Energy Efficient Transformers

Flame Retardant Material

- Flame Retardant, UL 94V0 Rating
- High Efficiency
- 2.4VA to 100VA Power Rating
- Single or Dual Primary, 115-120V, 230-240V, 277V, or 115-120V / 230-240V
- 50/60Hz (Economy 60Hz-only Models Available)
- Center-tapped Secondary (Optional Single or Dual)
- Any Secondary Voltage from 5V to 120V in 1V Increments
- Insulation Material 130°C Standard (Optional 200°C)
- High Isolation, 2500 Vrms, 100% Tested
- Low Capacitive Coupling, no Electrostatic Shield Needed
- Color Coded Hook-up Wires, 6" Standard Length
- Optional Internal current or thermal protector

Agency Approvals:

- UL/cUL 5085-2 Recognized (File E47299)
- UL 1446 Recognized Insulation system (File E95662)
- UL/cUL 5085-3 Class 2 Recognized (File E43609), Only L002 (up to 24V)

VA Rating		Secondary Voltage	Dimensions (Inches)			
			L	W	H	MC
L002	2.4VA	Parallel from 5V to 60V Series, single & center-tapped from 10V to 120V	1.45	1.40	1.19	1.75
L006	6VA		1.70	1.50	1.38	2.00
L012	12VA		1.95	1.64	1.62	2.38
L020	20VA		2.32	1.60	1.94	2.81
L030	30VA		2.32	2.00	1.94	2.81

Over 75,000 additional Commander Class model configurations available!

Refer to the Part Numbering Scheme on the next page to **configure your own part** with following options:

- Primary: Single or Dual
- Secondary: 5V to 120V, in 1V increments (Single, Dual, or Tapped)
- Frequency: 50/60Hz, or economy 60Hz-only
- With or without current or thermal protector(s)
- Temperature Class: 130°C, or 200°C

Any application, Any requirement, Contact us for our Custom Designs

POWERVOLT GROUP

Chassis Mount - Lead Wires

High Performance

Series: Commander Class (L)

Ener-G-Star™
Energy Efficient Transformers

Flame Retardant Material

- Flame Retardant, UL 94V0 Rating
- High Efficiency
- 2.4VA Power Rating
- Single or Dual Primary, 115-120V, 230-240V, or 115-120V / 230-240V
- 50/60Hz (Economy 60Hz-only Models Available)
- Single Secondary (Optional Dual or Center-tapped)
- Any Secondary Voltage from 5V to 24V in 1V Increments
- Insulation Material 130°C Standard (Optional 200°C)
- High Isolation, 2500 Vrms, 100% Tested
- Low Capacitive Coupling, no Electrostatic Shield Needed
- Color Coded Hook-up Wires, 6" Standard Length
- Optional Internal current or thermal protector

Class 2

Agency Approvals:

- UL/cUL 5085-2 Recognized (File E47299)
- UL 1446 Recognized Insulation system (File E95662)
- UL/cUL 5085-3 Class 2 Recognized (File E43609), L002 (up to 24V)

VA Rating		Output Voltage	Dimensions (Inches)			
			L	W	H	MC
L002	2.4VA	Up to 24V only	1.45	1.40	1.19	1.75

Partial Selection Guide (Standard Stock)

Part Number			
115-120V Primary	115-120V/230-240 Primary	230-240V Primary	Secondary
L002-1-710	L002-2-710	L002-3-710	10V @ 250mA

POWERVOLT GROUP

International Series Printed Circuit Mount

High Performance

Series: Admiral Class (IP)

Examples:

IP056-2-824A = 56VA, Dual (series/parallel) Primary, 50/60Hz, with 130°C thermal cutoff, Single 24V Secondary

Printed Circuit Mount, International	IPXXX	-X	XXX	X
Rating: IP002 = 2.5VA IP005 = 5VA IP010 = 10VA IP020 = 20VA IP030 = 30VA IP056 = 56VA				
Primary Voltages: -1 = 115-120V -2 = 115-120V / 230-240V Dual (series / parallel) -3 = 230-240V -4 = 100/110/120, unavailable on 2.5, 5, 10VA models -6 = 200/220/240, unavailable on 2.5, 5, 10VA models -7 = 120/220/240, unavailable on 2.5, 5, 10VA models				
Secondary Voltages (10 through 240, in 1V Increments): 010 through 240 = Dual Secondary (series / parallel) Number represents the voltage of the series connection. <i>Example: "024" = 12V (parallel) / 24V (series)</i> 510 through 740 = Center-tapped Secondary Number represents the total voltage plus 500. <i>Example: "524" = 24V with center-tap (12V on each side)</i> 810 through 1040 = Single Secondary Number represents the voltage plus 800. <i>Example: "824" = 24V</i>				
Optional internal protector: Blank = No internal protector A through Z = Over-current and/or over-temperature protection (Contact for list of available protectors)				

Any application, Any requirement, Contact us for our Custom Designs

Over 90,000 additional Admiral Class (Printed Circuit) model configurations available!

Refer to the Part Numbering Scheme on the next page to **configure your own part** with following options:

- Primary: Single or Dual
- Secondary: Single, Dual, or Tapped
- Frequency: 50/60Hz, or economy 60Hz-only
- With or without current or thermal protector(s)
- Temperature Class: 130°C, or 200°C

Any application, Any requirement, Contact us for our Custom Designs

POWERVOLT GROUP

International Series Printed Circuit Mount - Standard Profile Shrouded Primary Series: SPW

- Flame Retardant - UL 94V0 Rating
- Power Rating 2.5VA to 20VA
- Primary, 115/230V
- Frequency 50/60HZ
- Secondary Voltage 5 - 36V
- High Isolation – 4500 Vrms
- Insulation Material (130°C) Standard
- Coated to resist dust and moisture

Agency Approvals:

- UL/cUL UL 5085-3 Class 2 or Class 3 for U.S. & Canada (File E49606) or CSA File 063944
- UL 1446 Recognized Class B (130°C), Insulation System File E95662

• Indicates Like Polarity
Dual Primaries are designed to be used simultaneously. That is, they must be used either series or parallel connected (as one winding). Same applies to dual secondaries.

VA Rating	Dimensions (Inches)								Schematic

International Series Printed Circuit Mount - Low Profile
Econoline
Series: SPW

- Flame Retardant - UL 94V0 Rating
- Power Rating 2.5VA to 9VA
- Primary, 115/230V (encapsulated)
- Frequency 50/60HZ
- Secondary Voltage 10 - 230V
- High Isolation – 4000 Vrms
- Insulation Material (130°C) Standard
- Coated to resist dust and moisture

Agency Approvals:

- UL/cUL UL 5085-3 Class 2 or Class 3 for U.S. & Canada (File E49606)
- UL 1446 Recognized Class B (130°C), Insulation System File E95662

International Series Printed Circuit Mount - Low Profile
Series: SPW

- Flame Retardant - UL 94V0 Rating
- Power Rating 6VA to 24VA
- Primary, 115/230V (encapsulated, 6VA only)
- Frequency 50/60HZ
- Secondary Voltage 10 - 230V
- High Isolation – 4000 Vrms
- Insulation Material (130°C) Standard
- Coated to resist dust and moisture

Agency Approvals:

- UL/cUL 5085-3 Class 2 or Class 3 or Construction (depending on the model) File E49606 and CSA 063944 (6VA & 24VA)
- UL 5085-3 Class 2 or Class 3 or Construction (depending on the model) File E49606 (12VA)
- UL 1446 Recognized Class B (130°C) Insulation System File E95662 (6VA, 12VA, 24VA)

- Indicates Like Polarity

Dual Primaries are designed to be used simultaneously. That is, they must be used either series or parallel connected (as one winding). Same applies to dual secondaries.

POWERVOLT GROUP

Lighting the way.

Lighting Transformers

- 50 Watt or 75 Watt
- Designed specifically for 12V halogen lamps
- UL/cUL/CSA approved
- Insulation class 130°C or 200°C
- Several mounting styles available

Any application, Any requirement, Contact us for our Custom Designs

POWERVOLT GROUP

International Series Chassis Mount High Performance Series: Admiral Class (IT)

Examples:

IT025-2-824A = 25VA, Dual (series/parallel) Primary, 50/60Hz, with 130°C thermal cutoff, Single 24V Secondary

Chassis Mount with Terminals, International	ITXXX	-X	XXX	X
Rating: IT025 = 25VA IT043 = 43VA IT080 = 80VA IT130 = 130VA IT175 = 175VA				
Primary Voltages: -1 = 115-120V -2 = 115-120V / 230-240V Dual (series / parallel) -3 = 230-240V -4 = 100/110/120 -6 = 200/220/240 -7 = 120/220/240 -8 = 100/120/200/220/240, unavailable on 25 & 43 VA models				
Secondary Voltages (10 through 240, in 1V Increments): 010 through 240 = Dual Secondary (series / parallel) Number represents the voltage of the series connection. <i>Example: "024" = 12V (parallel) / 24V (series)</i> 510 through 740 = Center-tapped Secondary Number represents the total voltage plus 500. <i>Example: "524" = 24V with center-tap (12V on each side)</i> 810 through 1040 = Single Secondary Number represents the voltage plus 800. <i>Example: "824" = 24V</i>				
Optional Internal Protector: Blank = No internal protector A through Z = Over-current and/or over-temperature protection (Contact for list of available protectors)				

Any application, Any requirement, Contact us for our Custom Designs

International Series Chassis Mount - Quick Connect

High Performance

Series: Admiral Class (IT)

Ener-G-Star™
Energy Efficient Transformers

Flame Retardant Material

- Flame Retardant, UL 94V0 Rating
- High Efficiency
- 25VA to 175VA Power Rating
- Single or Dual Primary, 115-120V, 230-240V, or 115-120V / 230-240V (Optional 120 with taps, 240 with taps, or 120/240 with taps)
- 50/60Hz (Economy 60Hz-only Models Available)
- Dual Secondary (Optional Single or Center-tapped)
- Any Secondary Voltage from 5V to 240V in 1V Increments
- Insulation Material 130°C Standard (Optional 200°C)
- Optional Internal Current or Thermal Protector
- High Isolation, 4000 Vrms, 100% Tested
- Quick-Connect Terminal with Slots for Optional Soldering

Agency Approvals:

- UL/cUL 5085-2 Recognized (File E47299)
- IEC/EN60950 61558-2-4 or 61558-2-6 Certified (TÜV B 016550 0020)
- UL 1446 Recognized Insulation system (File E95662)

Over 75,000 additional Admiral Class (Quick-Connect Terminals) model configurations available!

Refer to the Part Numbering Scheme on the next page to **configure your own part** with following options:

- Primary: Single, Dual, or Tapped
- Secondary: 5V to 240V, in 1V increments Single, Dual or Tapped
- Frequency: 50/60Hz, or economy 60Hz-only
- With or without current or thermal protector(s)
- Temperature Class: 130°C, or 200°C

Any application, Any requirement, Contact us for our Custom Designs

International Series Chassis Mount - Quick Connect Series: SPWC

- Power Rating 6VA
- Primary, 115/230V
- Frequency 50/60HZ
- Secondary Voltage 10 - 230V
- High Isolation – 4000 Vrms
- Insulation Material (155°C) Standard
- Coated to resist dust and moisture

Agency Approvals:

- UL/cUL 5085-2 and/or -3, 60601-1, 62638 and EN/IEC 61558 compliant construction
- UL 1446 Recognized Class F (155°C), Insulation System File E95662

POWERVOLT GROUP

DC POWER SUPPLIES

REGULATED AND UNREGULATED

Stepping Motor Power Supplies

Series STP:

- Ideal for use with various stepper motor drives
- Integral motor and logic (5Vdc $\pm$ 5%) power
- Dual 120/240V switch-selectable input voltage
- UL, CSA, CE Marked

Series STP

Linear Regulated Power Supplies

Series BVA:

- Field selectable Input - 100/117/220/230-240/480 VAC
- Single, dual, triple output
- Overload and short circuit protection
- 2 year warranty
- UL, CSA, CE Marked

Series BVA

Linear Unregulated Power Supplies

Series BVU:

- Field selectable Input - 103/115/126/207/230/253VAC
- Fuse protected output
- Improved Ripple - 3% maximum
- 2 year warranty
- UL, CSA, CE Marked

Series BVU

Any application, Any requirement, Contact us for our Custom Designs

International Series Chassis Mount

Series: Admiral Class (IL)

Examples:

IL056-2-824A = 56VA, Dual (series/parallel) Primary, 50/60Hz, with 130°C thermal cutoff, Single 24V secondary

Chassis Mount with Lead Wires, International	ILXXX	-X	XXX	X
Rating: IL002 = 2.5VA IL005 = 5VA IL010 = 10VA IL020 = 20VA IL025 = 25VA IL030 = 30VA IL043 = 43VA IL056 = 56VA IL080 = 80VA IL130 = 130VA IL175 = 175VA				
Primary Voltages: -1 = 115-120V -2 = 115-120V / 230-240V Dual (series / parallel) -3 = 230-240V -4 = 100/110/120 -6 = 200/220/240 -7 = 120/220/240 -8 = 100/120/200/220/240				
Secondary Voltages (10 through 240, in 1V Increments): 010 through 240 = Dual Secondary (series / parallel) Number represents the voltage of the series connection. <i>Example: "024" = 12V (parallel) / 24V (series)</i> 510 through 740 = Center-tapped Secondary Number represents the total voltage plus 500. <i>Example: "524" = 24V with center-tap (12V on each side)</i> 810 through 1040 = Single Secondary Number represents the voltage plus 800. <i>Example: "824" = 24V</i>				
Optional Internal Protector Blank = No internal protector A through Z = Over-current and/or over-temperature protection (Contact for list of available protectors)				

Any application, Any requirement, Contact us for our Custom Designs

POWERVOLT GROUP

International Series Panel Mount - Lead Wires

Series: Admiral Class (IL)

Ener-G-Star™
Energy Efficient Transformers

Flame Retardant Material

- Flame Retardant, UL 94V0 Rating
- High Efficiency
- 2.5VA to 56VA Power Rating
- Single or Dual Primary, 115-120V, 230-240V, or 115-120V / 230-240V (Optional 120 with taps, 240 with taps, or 120/240 with taps)
- 50/60Hz (Economy 60Hz-only Models Available)
- Dual Secondary (Optional Single or Center-tapped)
- Any Secondary Voltage from 5V to 240V in 1V Increments
- Insulation Material 130°C Standard (Optional 200°C)
- Optional Internal Current or Thermal Protector
- High Isolation, 4000 Vrms, 100% Tested
- Color Coded Lead Wires, 6" Standard Length

Agency Approvals:

- UL/cUL 5085-2 Recognized (File E47299)
- IEC/EN60950 61558-2-4 or 61558-2-6 Certified (TÜV B 016550 0020)
- UL 1446 Recognized Insulation system (File E95662)

VA Rating		Secondary Voltage	Dimensions (Inches)

Over 150,000 additional Admiral Class (Lead Wires) model configurations available!

Refer to the Part Numbering Scheme on page 36 to **configure your own part** with following options:

- Primary: Single, Dual
- Secondary: 5V to 240V, in 1V increments Single, Dual, or Tapped
- Frequency: 50/60Hz, or economy 60Hz-only
- With or without current or thermal protector(s)

Any application, Any requirement, Contact us for our Custom Designs

POWERVOLT GROUP

International Series Chassis Mount - Lead Wires

Series: Admiral Class (IL)

Ener-G-Star™
Energy Efficient Transformers

Flame Retardant Material

- Flame Retardant, UL 94V0 Rating
- High Efficiency
- 25VA to 175VA Power Rating
- Single or Dual Primary, 115-120V, 230-240V, or 115-120V / 230-240V
(Optional 120 with taps, 240 with taps, or 120/240 with taps)
- 50/60Hz (Economy 60Hz-only Models Available)
- Dual Secondary (Optional Single or Center-tapped)
- Any Secondary Voltage from 5V to 240V in 1V Increments
- Insulation Material 130°C Standard (Optional 200°C)
- Optional Internal Current or Thermal Protector
- High Isolation, 4000 Vrms, 100% Tested
- Color Coded Lead Wires, 6" Standard Length

Agency Approvals:

- UL/cUL 5085-2 Recognized (File E47299)
- IEC/EN60950 61558-2-4 or 61558-2-6 Certified (TÜV B 016550 0020)
- UL 1446 Recognized Insulation system (File E95662)

Isolation Transformers - Printed Circuit Mount

6 Pins

Series: P24H

- Power Rating 1.1VA to 36VA
- Single Primary, 24V
- Frequency 50/60HZ
- Series or Parallel Secondary
- Dielectric Strength – 2500 Vrms
- Insulation Class B (130°C)
- Low Capacitive Coupling, no Electrostatic Shield Needed

Agency Approvals:

- UL/cUL 5085-2 Recognized (File E47299)
- UL 1446 Insulation System File E95662

• Indicates Like Polarity

Dual Secondaries are designed to be used simultaneously. That is, they must be used either series or parallel connected (as one winding).

POWERVOLT GROUP

DC Power Supply - Linear Regulated Series: BVA

- Single, dual, triple outputs
- Worldwide field selectable 100/117/220/230-240VAC input
- Rated full load at 50°C
- Overload and short circuit protection
- Remote sense compensates for line drop and assures voltage the load
- Reverse Polarity protection
- Open sense lead protection
- Overvoltage Protection (OVP) standard on 5V main outputs
- Up to 600 watts regulated output
- Made in the U.S.A.
- 2 year warranty

Agency Approvals:

- UL File # E181899
- CB Scheme, File #MC3535
- CE Marked

The International Series BVA

The BVA series is the premium grade, open frame line of linear DC power supplies. Designed to operate over a wide range of AC power sources found worldwide, the BVA series is especially suited for OEM applications where cost is a significant factor. The field selectable universal input (100/117/220/230-240VAC) reduces your inventory cost by allowing you to use just one standard model regardless of destination.

Value Added Services

PowerVolt offers a wide variety of value added services and design features to meet your application requirements. The first and foremost service we offer is our flexibility to design custom units for your application. Other features include, but are not limited to, terminal blocks, mounting spacers, fuse and fuse holders, line cords etc. Please contact your local factory representative, distributor or factory direct for quotations.

Specifications

AC Input: Field selectable taps for 100/117/220/230-240 VAC $\pm 10\%$; 47-63Hz. See chassis ID label for jumper and line fusing requirements. For 50Hz operation derate output by 10%

DC Output: See selection guide for voltage/current ratings. The output is floating; either positive or negative terminal can be grounded. Output adjustment range is $\pm 10\%$, except variable 10-18V outputs.

Line Regulation: $\pm 0.05\%$ for 10% line change

Load Regulation: $\pm 0.05\%$ for 50% load change

Thermal Regulation: $\pm 0.02\%$ per °C maximum, $\pm 0.005\%$ per °C typical

Output Ripple: 2mV RMS maximum, 3mV P-P

Dynamic Response: 30 microseconds for 50% load change

Stability: $\pm 0.03\%$ for 24 hour period after 1 hour warm up

Short Circuit and Overload Protection: Foldback current limiting, set at 120% of nominal

Overvoltage Protection: Crowbar overvoltage protection is standard on all 5VDC main outputs and is factory set at $6.2V \pm 0.4V$ (fixed). Optional universal OVP module adjustable from 4.5 to 36V is available for other models.

Remote Sensing: Standard on all outputs above 30 watts. Remote sense will compensate for a cable drop of 0.25V. Protected against open or shorted sense leads. Twisted pair sense leads are recommended.

Efficiency: 5V units: 45%; 12 and 15V units: 55%; 24V and higher units: 60%

Operating Temperature: 0°C to 50°C full rated load, derate linearly to 40% at 70°C. See derating chart.

Storage Temperature: -55°C to +85°C

Vibration: Per MIL-STD-810B, Method 514, Procedure I, Curve AB (to 50 Hz)

Shock: Per MIL-STD-810B, Method 516, Procedure V

Safety Standards: • UL 60950-1, Second Edition • CSA C22.2 No. 60950

• CE Marked • CB Scheme

Finish: Clear anodized aluminum chassis. Also serves as heat sink.

Mounting: Units can be mounted on several surfaces. Mounting holes will accept press fit #6-32 threaded fasteners. For efficient cooling, allow unrestricted air flow. Forced air cooling may be recommended.

Linear Regulated DC Power Supplies: Operation and Application Notes

AC Input Wiring and Fusing

The universal transformer allows four input voltage ranges - 100/117/220/230-240 VAC $\pm 10\%$. All standard models are factory wired for 117V operation. Before operation at a specific line voltage, the proper input jumpers must be installed. Adequate input fusing is also recommended. For jumper scheme and fusing requirements, refer to the unit ID label or the table below.

Input (VAC)	100	117	220	230-240
Jumper	1 - 2 3 - 4	1 - 2 3 - 4	2 - 3	2 - 3
Apply AC	1 - 5	1 - 4	1 - 5	1 - 4
Fuse	See unit ID label. Recommended 150% of output current			

Jumping Example: For operation at 117VAC, jumper 1-2 and 3-4; and apply AC input to 1 - 4.

DC Output Wiring

Local Sense

When load leads are not too long and remote regulation is not required, simply connect the load to the output terminals marked +Vo or +Out and -Vo or -Out. **Load leads must never be connected to the sense terminals.** Open sense lead protection is built-in and strapping the sense leads to the output leads is not needed, but is recommended.

Remote Sense

All models above 30 watts are provided with remote sense feature to compensate the load line drop and to permit a remote point of regulation. The figure below shows proper wiring for a power supply with remote sensing.

The remote sense can compensate a line drop of up to 0.25V. The load leads must be sized so that the line drop does not exceed 0.25V - the lesser the better. To provide noise immunity, it is recommended to use twisted pair or shielded pair for sense leads. A small AC decoupling capacitor (0.1 to 10 microfarad) across the sense terminals will also enhance the noise immunity. In some applications, the power supply output tends to oscillate due to the phase shift caused by the line resistance and inductance. The addition of capacitor C1 will reduce output impedance and provide stability. The recommended value of C1 is 100 microfarads per ampere or 50 microfarads per foot of lead wire.

Grounding

The grounding, if not done right, can have a significant effect on the overall system performance. A single point grounding the system should be employed, whenever possible, to eliminate ground loops and to improve regulation.

Thermal Considerations

In normal operation the chassis gets hot due to the heat generated in the regulator. An unrestricted mounting area is recommended. Moving air is desirable in confined areas. The chassis may be mounted on the other heat dissipating surfaces to improve cooling.

Overvoltage Protection (OVP) Adjustment

The overvoltage is fixed on +5V outputs and is factory set at $6.2 \pm 0.4V$. On all other outputs, a separate universal OVP module should be used. Single output units normally have their OVP adjusted at 1 to 2 volts or 10 to 20% (whichever is greater) above the nominal output voltage. For dual output units, the criteria applies above the sum of the two voltages. Adjust OVP as follows:

- Adjust OVP potentiometer fully clockwise
 - Apply AC input voltage
 - Adjust output voltage to the desired overvoltage trip point
 - Turn the OVP potentiometer counterclockwise until output voltage is crowbarred to approximately 1 volt
 - Switch the AC input off and adjust the output voltage down.
- Reapply AC input voltage and adjust the output up to verify the set point.

Overload Adjustment

The overload is factory set at 110 to 120% and should not require any adjustment. If this has been changed or require recalibration, it can be accomplished as follows:

- Adjust OL potentiometer fully clockwise
- Apply AC input voltage
- Adjust output to the lowest voltage of the specified voltage range
- Adjust the load current to 110 to 120% of rated output current
- Slowly turn the OL potentiometer counterclockwise until the voltage starts decreasing

Options:

Screw Terminals (T): Solder terminals standard.

Add "T" for screw terminals, 20A/300V

Overvoltage Protection (OVP): OVP is standard on all 5V main outputs. Add "OVP" to part number for individual OVP module on other models up to 36VDC outputs.

Mounting Spacers (S): For mounting spacers on any one surface add "S" to part number. Not available on FS and GS case sizes.

Input Fuse (F): For input fuse and fuse holder add "F" to part number.

Line Cord (C): For input line cord add "C" to part number.

Surge Absorber (M): Input MOV 150V for line voltage of 100-117VAC; and 320V for line voltage of 220-240VAC.

Ask for specials.

Custom variations quoted and shipped promptly.

DC Power Supply - Linear Regulated Series: BVA (240/480V Input)

- 240/480 VAC input; 50/60 HZ
- Output is regulated DC power
- Up to 720 watts regulated output
- MTBF over 250,000 hours
- Low radio interference
- Output ripple as low as 2mV RMS
- Standard overload protection
- Standard reverse polarity protection
- Standard short circuit protection
- Standard remote and local sense (most models)
- Vibration and shock per MIL-STD-810B
- Two year warranty

This latest addition to our Power Supply Line has been introduced after much demand. Endless applications will be more cost effective with DC power attainable directly from your high line. All power supplies listed here have an input voltage of 240/480 VAC

Value Added Options Include:

- Screw terminal block
- Overvoltage protection (standard on 5 volt models)
- Mounting spacers
- Input fuse

Specifications:

AC Input: 240/480 VAC +/-10%, 47-63Hz. See

chassis ID label for jumper and line fusing requirements.

DC Output: See Selection Guide for voltage/current ratings.

The output is floating; either positive or negative terminal can be grounded.

Output adjustment range is +/-10%, except variable 10-18V outputs.

Line Regulation: +/-0.05% for 10% line change.

Load Regulation: +/-0.05% for 50% load change.

Thermal Regulation: +/-0.02% per °C maximum, +/-0.005% per °C typical

Output Ripple: 2mV rms maximum, 3mV P-P.

Dynamic Response: 30 microseconds for 50% load change.

Stability: +/-0.3% for 24 hour period after 1 hour warm-up.

Short Circuit and Overload Protection: Foldback current limiting, set at 120% of nominal

Overvoltage Protection: Crowbar overvoltage protection is standard on all 5 VDC main outputs and is factory set at 6.2V +/-0.4V (fixed). Optional universal OVP module adjustable from 4.5 to 36V is available for other models.

Remote Sensing: Standard on all outputs above 30 watts.

Remote sense will compensate for a cable drop of 0.25V.

Protected against open or shorted sense leads. Twisted pair sense leads are recommended.

Efficiency: 5V units: 45%; 12 and 15V units: 55% 24V and higher units: 60%.

Operating Temperature: 0°C to 50°C full rated load, derate linearly to 40% at 70°C.

Storage Temperature: -55°C to +85°C.

Vibration: Per MIL-STD-810B, method 514, procedure 1, curve AB (to 50Hz).

Shock: Per MIL-STD-810B, method 516, procedure V.

Safety Standards: Designed to meet safety regulations of UL, CSA, VDE, CE and other international standards.

Finish: Clear anodized aluminum chassis. Chassis also serve as heat sink.

Mounting: Units can be mounted on several surfaces.

Mounting holes will accept press fit # 6-32 threaded fasteners.

For efficient cool, allow unrestricted airflow.

Forced air cooling may be recommended.

POWERVOLT GROUP

DC Power Supply - Unregulated (Open Frame) Series: BVU

- Low cost unregulated DC power supplies
- Field selectable input taps 103/115/126/207/230/253 VAC
allow fine-tuning the output voltage to match actual field conditions
- Improved ripple –3% maximum
- Fuse protected output
- Computer grade capacitors
- Floating output provides versatility for wiring
- Up to 1000 watts unregulated output

Agency Approvals:

- UL File # E181899
- CE Marked

The BVU Series

The BVU Series or unregulated DC power supplies is the best low cost alternative, where moderate output variations and AC ripple are acceptable. The field selectable input taps allow fine tuning the output voltage to match actual field conditions. The DC output is fused for short circuit protection. For maximum versatility, the output is floating and may be referenced to another low voltage common ground or placed in series with other DC power supplies.

Applications:

- DC Motors - Stepping and Servos
- Solenoid Valves
- Relays
- Lamps and Signal Systems
- Input to 3-terminal on-board regulators
- Drive Controls

Tap (VAC)	Nominal (VAC)	High Line (VAC)
115,-10%	103.5	113.9
115,NOM	115	126.5
115,+10%	126.5	139.2
230,-10%	207	227.7
230,NOM	230	253.0
230,+10%	253	278.3

Input Connections For BVU Series

JUMPER	1-5 2-6	1-5 3-7	1-5 4-8	2-5	3-5	4-5
INPUT APPLY	1-2	1-3	1-4	1-6	1-7	1-8
FUSE AT	See Unit ID Label					

Specifications:

AC Input:

115/230VAC, 50/60Hz nominal.

DC Output:

Floating fixed output at full load ratings (see table). Transformer taps provided for approx. 10% output voltage adjustment.

Ripple:

3% r.m.s maximum at nominal line and full-rated load.

Operating Temperature:

0-50°C (Derate 2% per °C to 70°C)

Overload and Short Circuit Protection:

Fused output. It should be noted that the fuse is not necessarily direct in line with the output. In most models the fuse is prior to the output capacitor and in case of a short circuit, the capacitor energy will be discharged into the load even if the fuse has opened.

Schematic shows transformer taps provided for approx. +/-10% output voltage adjustment. Typical full load output voltage at 115VAC input using taps 1 and 3. For 10% higher output voltage use taps 1 and 2. For 10% lower output voltage use taps 1 and 4.

DC Power Supply - StepperPower™ Series: STP

- Fully compatible with Applied Motion Products (and other) stepping motor drivers
- Integral motor (35Vdc) and logic (5Vdc $\pm 5\%$) power
- Space saving compact modules provide mounting studs for motor drivers
- Dual 120/240V switch-selectable input voltage
- Up to 500 watts regulated output
- Power-on LEDs, screw terminal connections
- Ideal for use with A.M.P. step motor drives 1335, 2035, 2035 O, 3535, 3535 O, 3540M or 3540MO.

Agency Approvals:

- UL File # E181899
- CE Marked

Description:

The STP series of power supplies provide unregulated DC voltage for motor power and tightly regulated 5Vdc power for logic circuitry. They are especially suitable for Applied Motion's step motor drives model numbers 1335, 2035 O, 3535, 3535 O, 3540M or 3540MO. The PC board and transformer are assembled on L-shaped aluminum chassis with threaded (# 6-32) PEM nuts provided on the side for the mounting drive module, thus making an integral power and driver unit. LED's indicate the power-on status of the motor and logic outputs. Input and motor output are fuse protected to avoid damage due to short circuits. The 5V logic output is electronically protected for overload and short circuit. The input is easily set to 120V or 240V with a slide switch provided on the PC board.

Specification:

Input Power: 120/240VAC $\pm 10\%$, 50/60Hz. Switch selectable. Factory set at 240V input.

Inrush Current: Estimated 12A at 120V and 15A at 240V.

Connections: Screw terminals.

Storage Temperature: -55°C to + 85°C.

Operating Temperature: 0-50°C at full rated load, derate linearly 20% up to 70°C maximum.

Humidity: 95% Non-condensing relative humidity maximum.

Cooling Method: Natural convection; allow unrestricted air flow for optimum operation.

Mounting: 4 each 0.213 dia holes, use #8 or #10 screws; clear anodized chassis.

Agency Approvals: UL, CSA approved; CE marked.

Output:

— Motor Power

STP-35AMP2.5: 35Vdc @ 2.5A Full Load (No Load 42Vdc)

STP-32AMP4: 32Vdc @ 4.0A Full Load (No Load 42Vdc)

STP-35AMP5: 35Vdc @ 5.0A Full Load (No Load 42Vdc)

— Logic Power

5VDC $\pm 5\%$ @ 500mA, regulated, electronically overload/short circuit protected.

Dimension Drawing: (All dimensions in inches)

VA Rating	Part No	Approximate No Load (VDC)	Approximate Under Load (VDC)	Logic Power

DC Power Supply - Three Phase Open Frame Series: BVZ

- **Unregulated DC Output**
- **480V, 3-phase input eliminates need for step-down transformer**
- **Field selectable 430/460/480/500/530V input taps**
- **Finger-safe and creepage-proof screw terminal Connections**
- **Up to 800 watts unregulated output**

The three phase open frame DC Power Supplies, Series BVZ, features an economical design to provide DC power source from a three phase line input of 480VAC $\pm$ 10%. Direct connection to the high voltage line eliminates the requirement for a step-down control transformer, making the overall project more economical and compact. Separate primary and secondary windings provide good isolation between the line and load sides.

For enhanced protection rating of the Series BVZ transformers, all connections are made through the creepage-proof terminals with screw and tab connection. The terminals are protected against finger touch, or contact with the back of the hand, in accordance with the Accident Prevention Regulations (VBG4).

Specifications:

AC Input:

430/460/480/500/530 VAC, 3 phase, 50/60Hz

DC Output:

24VDC, current rating see chart

Ripple:

5%rms maximum at nominal line and full load

Operating Temperature:

0°C to 40°C full rated load (derate 2% per °C to 70°C)

Overload and Short Circuit Protection:

Fused output

Applications:

- **DC Motors - Stepping and Servos**
- **Solenoid Valves**
- **Relays**
- **Lamps and Signal Systems**
- **Input to On-Board Regulators**
- **Drive Controls**

The screenshot displays the PowerVOLT Group website interface. At the top, there is a navigation bar with the company logo, a search bar, and links for 'My Account', a user profile icon, and a shopping cart icon. Below the navigation bar, a secondary bar contains links for 'About Us', 'Contact', a phone number, and 'Certificates & Compliance | Cross Reference | Online Catalog'. The main content area features a sidebar with a list of product categories under 'All Categories', including Industrial Control Transformers, Class 2 Transformers, and various printed and chassis mount transformer profiles. The main body of the page highlights 'New Products' with four featured categories: Configurable Industrial Control Transformers, Class 2 Transformers, High Efficiency Flame Retardant, and Prem Magnetics. Each category includes a brief description and a 'Generic Picture' of a representative product. Below these, there are three detailed product listings for the GP Series, Econoline, and Enclosed Control Transformers, each with a list of specifications and an 'Explore All' button.

POWERVOLT GROUP

**Class 2 Transformers
Specially designed for:**

- HVAC Industry
- Lighting Industry
- Vending Machines
- Irrigation Systems
- Beverage Dispensers
- Household Appliances
- Commercial Cooking, Food Warming & Ice Making Equipment
- Commercial Laundry Equipment
- Garage Door Controls
- Swimming Pool, Spas & Water Treatment
- Chimes, Door Bells
- Security systems
- Furnaces
- Humidifiers
- Decorative Lighting
- Intercom Systems
- And many others....

**General Purpose Power Transformers
serving:**

- Medical & Dental
- Process & Packaging Equipment
- Process Control & Sensor Equipment
- Power Generators & Monitoring Systems
- Residential & Commercial Signs
- Lighting & Fiber optics
- Automation & Conveyor Systems
- Welding Generators & Robots
- Mailing & Letter Handling Machinery
- Environmental Controls
- Aviation & Aerospace Equipment
- Studio & Public Address Sound Systems
- Metering, Instrumentation & Laboratory Equipment
- And many others...
